

find your way – a first help in economic statistics

Europe, United States, Japan, Netherlands, all countries

How to find an economic source, a chart or a time series? Use a browser. Sometimes data labels are changed. Therefore we don't give labels, but only browsing strategies. Use the browsing window to look for what may be interesting for you. If you have found such a page, then copy – paste the address label (ctrl c – ctrl v) to your own set of labels. Everyone can make his own set of economic sources. Browse with the bold text. (tested with Google)

Europe

Monthly overview of the Euro Area, charts and current data

European Commission economic financial affairs > economic databases > key indicators Euro Area
