in fact I have spoken about aesthetic but also about motor: the optimal one I beat 3000 24V of 164Q4 was not sure to the height of sport velleitÄ M5 type, and sure he was not worth the moneies that cost!!

As 156GTA was the natural antagonist of 330i and not sure of M3, 164Q4 in theory she was the natural antagonist of 530ix... that it is the 164 characterization too much truzza of and too much bad of 156, is only the fact that was the top of range has ingendered confusion in upgrades them customers, not giovando to the image.

In this 159 with the version Q4 3200 much sobria is a lot guessed +... Prox the preparation YOU could be like the Motorsport preparations on versions M of bmw... not hoping that they are TRULY technical and fuffa x to not only sell 2 seats particular sportswomen and 4 circles...

Staggering But I do not let go

beh I have brought back cio that bitree R-with regard to the q4 had written of the 164 that for the refined age was a lot. What remains of that system, beyond to the name, on 159 does not know it. Anch' I would want alpha to traction post..... but the gruppone.....

coast too much if in it puts into effect them production of the group not is null of similar, inasmuch as it is not alone issue of a tree, but of productive systems, management of the pianale platforms, position of motor and all the mechanical organs connect to you...

The example is that bmw it has made 1er TP why cost too much fundamentalally to make it TA to 😊 monaco jobs with what you have in house, if then in case not pole is one....

BUT we return IT
