 from the PaTaTo we are speaking about a comparison between 2 similar cars of the same one marks, we have already divagato too much inserting comparisons of market with others... we are po' a OT 😊 😊

ps: there is also audios today, not? and also they the motors of a sure power unload them alone with YOU, and they sell some to washbowls... unfortunately today goes still therefore, we attend tomorrow 😊

Ax!!! But at least audios in the race have carried it and something has won! Even if as soon as ended itself on fast automobile race tracks medium Alfa and Bmw to the A4 they passed they over!!!!!! But this will want to say something! That with powers of approximately 300cv the integral traction servants to one it does not saw if not on deep to low adhesion (type rain) and STOP!!

Motor M3 2.5I EVO2 257km/h to 8000g/m -- farfallati from 45, telephone exchange, cammes from race, rotary parts balanced and lightened, differentiates them self-locking, clutch in branch and change ZF

*but I do not understand that avra' the q4... been all in fixed Co
I am q4... up to now to the alpha has made them only to go
slowly piu', to weigh of piu' and consuming of piu'... boh....*

my speech leaves from the fatton that in that period of alpha to TA to see a something of various beautiful innovation was one. The integral traction of the 164 Q4 was a spanna over the competition but, this goes said, for the fact of the management electronic and of other anchor...

OT

just that one: I just to Vallelunga to september spremuta x benino anch', after that Emanuele Naspetti has made to make a pair me of turns from passenger x to see the limits of the car and the points key of the circuit 😊

There is a point in which I succeeded to go strongly verametne, but an other in which just I did not succeed to take confidenza...

Even of it we speak in other center tomorrow or after 😊

Fine OT
